Teachers' Training Class.

Morris High School is one of the 112 schools in the State under appointment to instruct a Teachers' Training Class. Graduates of this class secure a Professional Certificate, issued by the State Department, which is good for three years of teaching, and is renewable at the end of that time without examination, thus exempting the holder from the uniform examinations. In addition to this, persons holding the training class certificate as now issued will receive full credit on the first year's work in State Normal Schools for all subjects in the training class course, except methods, history of education, school management, drawing, and music.

The importance of securing a training class certificate was never greater than at the present time, since under the uniform system of examinations only four examinations are held in each commissioner district during the year, in which candidates must obtain at least 75 per cent. in each subject in order to pass, and at least 90 per cent. in order to exempt them in any subject from examination to examination. Teachers trying the uniform examinations are permitted to hold only one third and one second grade certificate. Therefore, in order to teach for any length of time they must secure a first grade certificate. Why not secure a training class certificate, which is of more value?

The Morris school has been appointed to instruct a Training Class because of its former success, and because it can comply with the following conditions which govern appointments: (a) The class shall be instructed for not less each day than four recitation periods of forty minutes each; (b) The instructors are Normal school graduates; (c) The class occupies a room by itself; (d) The class has opportunity to observe methods of teaching; (e) The recitations of the class are conducted separately from the other recitations of the school; (f) The class is maintained eighteen weeks each term.

QUALIFICATIONS FOR ADMISSION.

1. Candidates must be at least seventeen years of age at the time of entrance.
2. Candidates must intend to teach.
3. Candidates must hold as a minimum qualification one of the following credentials:
 - (a) A third grade certificate and a standing of 65 per cent. in civil government. Or a second grade certificate. These certificates must be in force, or have expired July 31, 1901.

(b) A Regents preliminary certificate and 14 academic counts, 4 of which shall be in English, 2 in American history, 2 in civil government, 2 in physiology, and the other 4 optional.

(c) Candidates may also qualify at the teachers' uniform examinations by attaining 65 per cent. in arithmetic, composition, geography, grammar, orthography, penmanship, physiology and hygiene, American history, and civil government.

4. Before being admitted to membership all candidates will be expected to read some brief general history that will serve as a preparation for the required work in history of education. (Write the Principal for such a history if you haven't one).

NO TUITION is charged members of the Training Class.

EXAMINATIONS.

The examinations of the Training Class shall begin on the third Tuesday of January, and on the second Tuesday of June, and continue three and one-half days. Members who attain a standing of 75 per cent. in all subjects will receive the Professional Certificate, which is valid for three years and thereafter renewable for five year periods if the holder has had at least two years of successful experience under the certificate.

POSITIONS.

School Commissioners are in duty bound to show a preference to teachers who have taken a course in the Training Class, and to assist them in securing good positions. No graduate of the Morris Training Class has failed to secure a position, and many have become successful teachers in Regents schools.

ORGANIZATION.

The class must consist of not less than ten nor more than twenty-five members. The first to make application, with the proper credentials, will be admitted. Those desiring to enter, should make application at an early date as possible to Principal Derrick, Morris, N. Y.
The class will be organized on Monday, September 9.
New classes are organized in September only, but candidates may be admitted at the beginning of the second term, Jan. 27, 1902, provided they pledge themselves to remain in the class a year.

COURSE OF STUDY IN TRAINING CLASS.

This course is designed to meet the requirements for a training class certificate, and to satisfy the conditions of admission to advanced classes in the Normal schools of the State.

FIRST TERM.

- FIRST PERIOD.—Arithmetic.
- SECOND PERIOD.—Psychology and principles of education, school management (including art of questioning).
- THIRD PERIOD.—History of education, American history (method and review).
- FOURTH PERIOD.—Drawing, general review.

SECOND TERM.

- FIRST PERIOD.—Language, composition, and grammar.
- SECOND PERIOD.—Geography, physiology.
- THIRD PERIOD.—Reading, civil government (method and review).
- FOURTH PERIOD.—School law, general review.

NOTE 1. In the foregoing course of study, the work in all subjects except history of education, psychology, school management and school law will include subject matter, underlying principles and method.

NOTE 2. Penmanship, spelling and the use of good English will receive careful attention from the beginning to the end of the year.

COMPULSORY EDUCATION.

First. The Compulsory Education Law is obligatory upon, and its enforcement required by, the school authorities of every city, union free school district, common school district and school districts created by special law, within this State.

Second. All children between eight and sixteen years of age in proper physical and mental condition are required to attend upon instruction, as in said law specifically stated, namely:

1. All children between eight and twelve years of age must attend during the entire period that public schools are in session between the first of October and the first of June following.
2. All children between twelve and fourteen years of age must attend at least eighty consecutive days during the same period, and the whole period unless lawfully employed.
3. All children between fourteen and sixteen years of age must attend when not lawfully employed.

Third. The teachers in such schools are required to keep a record of attendance of such children, as in said law specifically stated.

Fourth. All persons in parental relation to such children are required to cause such children to attend school, as in said law specifically stated, and any violations of the provisions of said law in that regard is a misdemeanor punishable by fine, or fine and imprisonment, as in said law specifically stated.

Fifth. Any person, firm or corporation employing any child or children contrary to the provisions of said law is liable to the payment of penalties as in said law specifically stated.

By direction of the State Inspector the Compulsory Education Law must be lived up to. Parents neglecting to keep their children in school must be fined, not to exceed \$5 for the first offense and \$50 for the second. One-half of the public money may be withheld from any district where the authorities neglect to enforce the law. Anything more than two unexcused absences during any month constitutes irregular attendance. Three times tardy counts the same as one absence.
